

Results: Circle Center Adult Day Services

- ◆ Circle Center Adult Day Services has a goal that frail and impaired older adults and their family caregivers, who participate actively in the program, will experience an enhanced quality of life allowing families to remain together as long as possible.

Results from 7/09 through 6/10 include:

- ❖ 100% (124/124) of those served met the criteria for nursing home care, but used adult daycare at Circle Center instead. They were able to live at home 30,271 days longer at a savings to their family and taxpayers of at least \$4,345,902.
- ❖ Family caregivers (58/76) also reported improved quality of their lives:
 - 100% reported Circle Center helped them cope
 - 100% said the Center met their needs for help with caregiving
 - 98% reported use of the Center's support and educational resources
 - 95% reported the Center helped them maintain valued life roles such as worker, caregiver, volunteer and church member
